

Balls/Snowball Instructions

Ball/Snowball Assembly

- 1. First, hoop your fabric of choice, I use plain craft felt off the shelf at my local craft store. You can use fleece, flannel, minky or any soft fabric that has at least a small amount of stretch.**
- 2. Float a piece of medium to heavy weight piece of stabilizer under your hoop.**
- 3. Stitch the embroidery design.**
- 4. Remove from hoop.**
- 5. Draw around the first panel 3 times to create all 4 panels needed.**

- 6. If your Snowball has ears, add them before stitching up the ball panels.**
- 7. Stitch panels together along the long edges to create ball, remember to leave an opening in the seam of one of the back panels, for turning and stuffing.**

- 8. Stuff your ball nice and firm to remove any bagging or wrinkles.**
- 9. Hand stitch the opening closed, and finished!**

Enjoy your finished Ball
